

Lufkin®

Tools That Work As Hard As You

Quad Hook™
tapes **outlast**
the competition.

Patented
Quad Hook™
Design Gives
the Blade
Longer Life

The weakest point of any measuring tape is the center of the blade's concave surface. The end hook on all power tapes have historically been riveted through this point increasing the potential of blade or end hook failure. Through extensive engineering, research and testing, Lufkin has developed the Quad Hook.

This patented feature moves the rivets out from the center to the edges giving our blades more strength. Independent laboratory testing proves that tapes with the Quad Hook reduce stress and strain and increase blade life.

Lufkin power tapes have always been built with the unsurpassed craftsmanship that you've come to depend on. The Quad Hook is one more innovation from a name you trust.
